- 華 : Hey, what are you doing with your smartphone, Ted? Watching movies?
- テッド : Oh, Hana. You're right. I'm enjoying watching a dance movie. My friends and I are going to perform the same dance on the stage soon.
- 華 : Sounds nice. I often enjoy watching dance movies, too. I also read books on the smartphone, but my mom doesn't like it. Can you help me think of some good points of reading books on smartphones?
- テッド : I have never thought about it, but it may be good to think about it.
- 華 : My mom is always telling me to read paper books. She also says that it is bad for my health to use my smartphone for a long time. But using them is a lot of fun and it is easy to get information, right?
- テッド : Yes, but, if they are not good for us, I think we have to think about the way of using them in the right way. Don't you read paper books or paper magazines?
- 華 : I sometimes read paper books, but when I read them, I soon feel sleepy. But I don't feel sleepy when I use my smartphone to look for something because I can find it in a short time.
- テッド : So you think a good point of using smartphones is to get information quickly. How about the good points of reading paper books?
- 華 : The good points of reading paper books? I have no idea. How about you?
- テッド : When I want to understand stories well, I read paper books. But, when I read on my smartphone, it is like looking for some words that are interesting and, if I cannot find something interesting, I always try to find other interesting words. This is my way of reading on my smartphone. What do you think?
- 華 : Well, I've never thought that way ..., but yes, it must be true.
- テッド : Actually, that is a thing that Maryanne Wolf says in her book.
- 華 : Maryanne Wolf? Who is she?
- テッド : She is a teacher at college, and she wrote a book. It says that reading paper books and reading books on smartphones are different. It is good to use smartphones when you want to look for something interesting, because it is easier to find it. It is good to read paper books when you want to understand a story. Also, you can remember things longer when you read paper books.
- 華 : So you mean if you use smartphones you cannot remember things for long. When you read paper books, you can remember things for a longer time. Then, if I want to get better results on the tests....,
- テッド : Yes, you have to put away your smartphone, go into your room, open your books and read. Then you can get better results on your tests!

華 : Ha, ha, ha, but I am not sure that I can live without my smartphone.

テッド : You don't have to always do that. Only when you have to study very hard. The important thing is to know how to use it and when to use it in the right way.
